

LIBRARY REPORT - 28 Nov 90  
(Due 5 Dec 90)

Some Scientific Journals with articles mostly or frequently on Genetics:

American Journal of Human Genetics  
American Naturalist  
Animal Genetics  
Annals of Human Genetics  
Behavior Genetics  
Biochemical Genetics  
Canadian Journal of Genetics and Cytology  
Cell  
Chromosoma  
Cytogenetics  
Evolution  
Gene  
Genetics  
Genetics Research  
Hereditas  
Human Heredity  
Immunogenetics  
Journal of Heredity  
Journal of Medical Genetics  
Journal of Molecular Biology  
Molecular and General Genetics  
Mutation Research  
Nature  
Proceedings Nat. Acad. Science  
Science  
Theoretical and Applied Genetics  
...etc.

Canadian Journal of Microbiology  
EMBO Journal  
Journal of Bacteriology  
Nucleic Acids Research  
Plant Molecular Biology  
Plasmid

Instructions:

1. Skim one issue of three journals (or more). List which.
2. Select one research paper (article or report) that appeals to you more than the others and read it in detail.
3. Write a synopsis or summary-abstract in about 100-150 words. Include the species and the kind of test of significance (if none, say so). Cite the reference of the paper read in detail at the beginning of the synopsis. Give the author, year, title, journal, volume and pages.
4. How could you use genetic research reports in your field of endeavor?

The report then should consist of approximately 200-250 words (one page, if typed).
